

ALOK DEO SINGH

STRATEGIC PROGRAMS & AI TRANSFORMATION LEADER

Noida, India

+91-9711269329

singhalokdeo@gmail.com

Two decades turning enterprise strategy into shipped outcomes — now leading AI-native transformation and global growth at Brightly Software, a Siemens company.

THE PITCH

I take high-stakes, cross-functional bets and bring them home — **on time, on budget, and with the team stronger for it.** I move fluently from executive strategy to engineering reality, and from legacy migration to AI-native product. Today I pair 20+ years of enterprise delivery across insurance, capital markets, analytics, IoT, and avionics with hands-on AI (Claude, RAG) to ship transformation that moves revenue, cost, and customer experience.

SIGNATURE WINS

- **AI, in production.** Built an **AI Program Management Copilot** on Claude + RAG — a single source of truth for plans, risks, dependencies, and governance, with instant executive insight and decision support.
- **New markets opened.** Owned New Solution Introduction into India & ANZ — a **\$9.17M ARR** India business case (sub-1-year payback) and a **~\$33M** ANZ manufacturing opportunity, validated with early lighthouse customers.
- **Legacy modernized.** Led Confirm's desktop-to-web migration (**~\$1.1M/yr**) — targeting **~£633K/yr** in Citrix savings, unlocking the US market, with **~90%** of users moved to web.
- **Migration at scale.** Moved **1M+** life-insurance policies onto a regional platform (AXA Indonesia) and ran releases up to **~\$1.9M** with teams to **50** — consistently on schedule and budget.
- **Hardware under pressure.** Delivered the **SVDU** avionics product across **21+ variants**, holding schedule and budget through pandemic supply-chain disruption.

SELECTED EXPERIENCE

- Brightly Software (a Siemens company)**2022 – Present
Strategic Programs Manager & Sr. Account Manager — **AI transformation, global NSI, and SaaS modernization for enterprise asset management.**
- Harman Connected Services**2016 – 2022
Sr. Account Manager & Account Manager — **SVDU avionics program; Nielsen analytics, Panasonic ML, and Entrust IoT security across a 50-person team.**
- Tata Consultancy Services**2005 – 2015
Software Engineer → Solution Architect & Program Manager (AXA, GE) — **regional insurance transformation, large-scale migration, and CCM platforms.**
- Food Circle**2015 – 2016
Co-Founder — **seed-funded marketplace scaled to 1,200+ customers and 8,000+ meals in 6 months.**
- Cognizant · Keane India**2003 – 2005
Software Engineer — **J.P. Morgan derivatives collateral management; Countrywide mortgage remittance.**

WHAT I DO BEST

- Strategic Program Ownership
- AI Product Transformation
- Generative AI & RAG
- New Solution Introduction
- Go-to-Market & Expansion
- Migration & Modernization
- Change Management
- Cross-Functional & Offshore Leadership

PROOF IN NUMBERS

- 20+**
years across delivery & program leadership
- 1M+**
policies migrated to one platform
- \$9.17M**
ARR market-entry business case
- 50**
person delivery team at peak
- 3**
global launches owned (NSI)
- £633K**
/yr license savings targeted

CREDENTIALS

- PMP** Project Management Professional
- CSM** Certified ScrumMaster
- CDAIO** Chief Digital & AI Officer — ISB, 2026
